### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: claims 1-8 & 10-18 are allowable over the prior art of record, because the prior art is silent to a separator for a lithium polymer battery comprising: a membrane with a plurality of pores extended from the first surface to the second surface; a coating covering the membrane, but not filling the micropores, wherein the coating has a surface density of 0.4 to 0.9 mg/cm<sup>2</sup> and comprises a gel-forming polymer and a plasticizer and. Claims 19-20 are allowable as a method of making the separator of claim 1.

Pekala teaches a separator comprising a gel forming polymer that is dissolved in a solvent. After the coating has been applied and the coating solution cooled on the web, the solvent is allowed to evaporate off. Pekala is silent to a separator comprising a gel forming polymer and plasticizer. The reference is also silent to the coating having a surface density of 0.4 to 0.9 mg/cm<sup>2</sup>. Therefore, the instant claims are patentably distinct from Pekala.

### *Conclusion*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
